

Declaration of TSCA and PFAS compliance

Dear Customer:

At Sunstone Circuits, we hereby declare our full compliance with the Toxic Substances Control Act (TSCA) and per- and polyfluoroalkyl substances (PFAS) requirements for the PCBs we manufacture.

Sunstone Circuits adheres to the regulations outlined in the Toxic Substances Control Act (TSCA), administered by the United States Environmental Protection Agency (EPA). All chemicals and substances used in our PCB manufacturing process fully comply with TSCA regulations, including reporting, testing, and restrictions.

Acknowledging the potential environmental and health concerns related to per- and polyfluoroalkyl substances (PFAS), Sunstone Circuits is committed to preventing their use in our PCB manufacturing process. We implement quality control measures to ensure our products are PFAS-free, aligning with relevant regulations and industry best practices.

Our commitment to sustainability and compliance extends across our supply chain, guaranteeing the highest levels of quality, safety, and environmental stewardship, ensuring compliance with TSCA and PFAS regulations.

This declaration reflects our unwavering commitment to TSCA and PFAS compliance. We stand behind the integrity and quality of our PCB products. For any inquiries or further information regarding our compliance efforts, please contact us directly.

Sincerely,

Sunstone Circuits
